Eclipses, 1876.

In the year 1876 there will be *Two Eclipses* of the Sun and *Two Eclipses* of the Moon, viz. :

I.—A *Partial Eclipse* of the Moon, March 9, 1876, partially visible at Greenwich.

The first contact of the shadow occurs at 176° from the Northernmost point of the Moon's limb, towards the East.

The last contact at 118° towards the West.

II.—An *Annular Eclipse* of the Sun, March 25, 1876, invisible at Greenwich.

Begins on the Earth generally, March 25, 5h. 29m., mean time at Greenwich, in Long. $170^{\circ}.40'$ West of Greenwich, and Lat. $5^{\circ}.41'$ South.

Ends on the earth generally, March 25, in Long. $65^{\circ}.47'$ West of Greenwich, and Lat. $52^{\circ}.29'$ North.

The middle of this Eclipse will be visible at sunset on March 25, at St. John's, Newfoundland.

III.—A *Partial Eclipse* of the Moon Sept. 3, 1876, visible at Greenwich.

The first contact with the shadow occurs at 8° from the Northernmost point of the Moon's limb, towards the East.

The last contact at 63° towards the West.

IV.—A *Total Eclipse* of the Sun, September 17, 1876, invisible at Greenwich.

This *Eclipse* will be visible to the inhabitants of the South Pacific, from the Phillipine Islands to Cape Horn, beginning and ending with the former, at sunrise, and with the latter, at sunset, on September 3, 1876.

The Eclipses of Jupiter's Satellites (given in the Greenwich Almanac to the nearest tenth of one second of time) afford the easiest means of knowing the Greenwich time and thence to determine the longitude of whatever place on the globe the observer may be situated. No calculation is required, but they cannot be observed at sea, the motion of the ship rendering it impossible to secure that steadiness of the instruments necessary to observe them.

True Latitude of Church Hill $47^{\circ}.34'$ North.

Longitude (West of Greenwich)..... $52^{\circ}.42'$ West.

Variation of the Compass, $32^{\circ}.30'$ and increasing *seven seconds* annually.

NOTE.—The Tide Tables (in the Calendar pages) may be rendered applicable to various other places on the coast, by simply adding or subtracting as the case may be, the difference between the times of High Water on the full and change of the Moon at St. John's, and the time of the full tide at any other harbor; for example, to find the time of High Water at any of the principal harbors of Conception Bay, add 45 minutes to the time at which it will be High Water at St. John's; for Placentia Bay, add 2 hours; for St. Peters, 1h. 50m.; for Ferrolle, on the French Shore, 4 hours, &c.—See table LVII of Norie's Epitome.

will be fair; but if the mist hangs upon the hills, and drags along the woods, there will be rain.

CLOUDS.—Against much rain the clouds increase very fast, especially before thunder. When they are formed like fleeces, but dense in the middle, and bright towards the edge, with the sky bright, they are signs of a frost, with hail, snow or rain.--

If they form high in the air, in thin white trains, like locks of wool, they portend wind and probably rain. When a general cloudiness covers the sky and small black fragments of clouds fly underneath, they are a sure sign of rain, and probably will be lasting. Two currents of clouds always portend rain, and in summer, thunder.

LIGHT HOUSES, HARBOR LIGHTS, &C.

Fort Amherst Light, at the entrance of *St. John's*—A light was first established at this station in 1813; in 1850 a new House, Lantern and apparatus were erected. The Light burns at an elevation of 114 feet, is produced by a double argand burner placed in the focus of an annular lens of the fourth order, and in favorable weather can be seen 16 nautical miles. When Cape Spear is enveloped in fog a heavy piece of ordnance is also discharged at this Fort every hour during daylight, to assist vessels in making the harbor. It is situated in lat. $47^{\circ}33'54''$ N. and long. $52^{\circ}40'18''$ W. John Sheppard, Keeper; Thomas Moore, Assistant.

St. John's—Two red lights are exhibited every night from sunset until sunrise, intended as leading marks for vessels entering the narrows. The lower Light on the roof of the Custom House—the other 400 yards in the rear, on a white post, within a few yards of the N.E. angle of the Congregational Church, and 180 feet above the level of the sea. These Lights will be readily distinguished from any other Lights in the town; and keeping them in a line bearing N.W. $\frac{1}{4}$ W., will lead in the largest vessel clear of all danger. To serve as leading marks also during the day, the pediment of the Custom House has been painted white; this is to be kept in line with the upper lantern, also painted white. Exhibited 1st September, 1863.

Cape Spear Light—This Light was first exhibited on the 1st September, 1835; it is produced by seven argand burners and silvered reflectors burning at an elevation of 264 feet—it revolves, shewing a bright Light every minute, and in favorable weather can be seen 26 nautical miles. It is situated in $47^{\circ}31'11''$ N. lat., and $52^{\circ}30'59''$ W. longitude. James Cantwell, Keeper; Dennis Cantwell, Assistant.

Cape Bonavista Light—Situate in lat. $48^{\circ}41'56''$ N., long. $53^{\circ}5'20''$ W.; is a revolving Light, showing alternately every 90 seconds a white and red Light. It is produced by 16 argand burners and reflectors, burns at an elevation above the sea of 150 feet, and in favorable weather can be seen 18 nautical miles. By keeping this Light open with Cape L'Argent, it will carry you clear of the Flower Rocks; first exhibited 11th September, 1843. Nicholas White, Keeper; Matthew White, Assistant.

Cape Pine Light—This tower is of iron, built by the Imperial Government in 1840-50, and first put into requisition on the 1st January, 1851. It is a fixed white Light, has 17 argand burners and reflectors—elevated above the level of the sea 314 feet—situated in lat. $46^{\circ}37'4''$ N., and in long. $53^{\circ}31'45''$ W. In a favorable state of the atmosphere it can be seen 26 nautical miles. George Hewett, Keeper; William Costleloe, Assistant.

Harbor Grace Beach Beacon and Light—First exhibited 11th September, 1850; stands on the point of Beach at the entrance of Harbor Grace. Sailing into Harbor Grace with a fair or leading wind, bring the Beach Beacon to bear W. or W. by S., and by keeping the Light or Building a little on the starboard bow it will bring you clear of the Bar, on which at low water there is not more than 8 feet of water. It is situated in lat. $47^{\circ}41'28''$ N., and in long. $53^{\circ}12'33''$ W., elevation above the sea level 40 feet; in clear weather it may be seen at a distance of 11 nautical miles. George Brown, Keeper.

Green Island Light at the entrance of Catalina Harbor, Trinity Bay—Situate in lat. $48^{\circ}30'16''$ N., long. $53^{\circ}2'40''$ W. This is a fixed white light, burns at an elevation of 92 feet above high water, and in favorable weather will be seen from E.N.E. seaward, to S.W., 15 nautical miles. Vessels bound Northward by keeping this Light open with the North Head of Catalina until Bonavista Light opens with Cape LeJean, will give the Flower Rocks an ample berth—or when coming from the Northward and bound for Catalina, by giving the N. Head a moderate berth, you will clear the Brandies Rocks by steering for Green Island Light. It was first exhibited in 1857. Peter Woods, Keeper; Peter Martin, Assistant.

Cape Race Light—Exhibits a revolving white Light, from sunset to sunrise. The light will be visible to seaward from N. E. by E., round by the S. E. and S. to W. The Light is elevated 180 feet above the mean water level of the sea, and may be seen in clear weather 19 nautical miles from a ship's deck. The tower is striped red and white vertically. It stands close to the old Beacon, which has been cut down. The Light House is in lat. $46^{\circ}39'30''$ N., long. $53^{\circ}4'30''$ W., and was first exhibited in 1856. Michael J. Hally, Keeper; George Simms, Assistant.

Cape Race Steam Fog Alarm—A powerful Steam Whistle has been placed on Cape Race, about 250 feet south of the Light House, which is sounded during thick or foggy weather or snow storms, for ten seconds, with intervals of silence of fifty seconds, in each minute. The Whistle will probably be heard in calm

weather 20 miles; with the wind 30 miles; and in stormy weather against the wind, from seven to ten miles. Patrick Myrick, Engineer.

Dodding Head, Great Burin Island Light—This Light was put in requisition on the 3rd August, 1858, and is exhibited every night from sunset to sunrise. It is revolving, catoptric of the second order, producing a brilliant White Light every minute, burning at an elevation of 430 feet above the level of the sea, and in favorable weather can be seen 29 miles—situated in $47^{\circ} 0'.26''$ North Latitude, $55^{\circ} 8'.43''$ West Longitude. Austin Sheppard, Acting Keeper; John Churchill, Assistant.

Offer Wadham Island Light—Was first exhibited on the 4th October, 1858, and is lighted every night from sunset to sunrise. The Light is a steady, fixed lens-light, burning on a circular Brick Tower, 100 feet above the level of the sea, and can be seen in a favorable state of the atmosphere 15 nautical miles. Situated in Latitude $49^{\circ} 36'.0''$ North, Longitude $53^{\circ} 45'.6''$ West. Charles Prowse, Keeper; Henry Waterman, Assistant.

Baccalieu Island Light—This light is exhibited every night from the going away of daylight in the evening to the return of daylight in the morning. The Light House situated on the Northern end of the Island—Latitude $48^{\circ} 8'.51''$ North, Longitude $52^{\circ} 47'.50''$ West—the tower is of brick, the keeper's dwelling (a square building detached from the tower,) is painted white, with the roof red.

The light is a catoptric first class Holophotal revolving white Light, shewing a flash every twenty seconds. It is elevated, 443 feet above high water, and can be seen in clear weather 30 nautical miles, and a lesser distance according to the state of the atmosphere. When the southern end of the Island bears N.N.E., the Light will not be visible when nearer the Island than 8 miles. It was first exhibited in 1858. John Ryan, Keeper; Michael Ryan, Assistant.

Cape St. Mary's Light—Was put into requisition on the 20th September, 1860; it is a revolving catoptric Light of the first order, producing alternately every minute a brilliant red and a white light, burning at an elevation of 300 feet above the level of the sea, and will be seen in a favorable state of the atmosphere 26 nautical miles from a vessel's deck; situated in $46^{\circ} 49.30'$ N. lat., $54^{\circ} 11'.34''$ W. long. The tower is of brick, and on each side of which stands the dwellings of the keeper and assistant, the sides of which are painted white, roofs red. John Rielly, Keeper; Wm. J. Collins, Assistant.

Brunet Island Light, Mercer's Head, Fortune Bay—First exhibited 27th June, 1835. It is a powerful flashing white Light, and attains its greatest brilliancy every ten seconds. It burns at an elevation of 408 feet above the level of the sea, and in clear weather may be seen at a distance of 35 miles, and be visible in every direction from North round East and South, to W.N.W. Mercer's Head is a bold headland, and situated in long. $55^{\circ} 59'.30''$ W., and lat. $47^{\circ} 16'$ N. Martin Sparrow, Keeper; Jas. Gaulton, Assistant.

Harbor Grace Island Light—The fixed Light for many years past exhibited at Harbor Grace Island, in Conception Bay, was discontinued on the 1st December, 1869. The Light at that station is now revolving, showing in every direction two white flashes, followed by one red flash. The interval between each flash in attaining its greatest brilliancy will be 30 seconds. This Light, in a favorable state of the atmosphere, will be seen 25 nautical miles. It is situated in lat. $47^{\circ}42'45''$ N., and long. $53^{\circ}8'15''$ W. Austin Oke, Keeper; Ptk. Houlahan, Assistant.

Ferryland Head Light—First exhibited on the 1st October, 1871. From sunset to sunrise a steady white Light of the 3rd order, burning on a brick tower 200 feet above the level of the sea, visible in favorable weather 16 nautical miles. Ferryland Head Light is situated in lat. $47^{\circ}00'58''$ N., and long. $52^{\circ}51'07''$ W. The tower is of red brick; the keepers dwelling, detached from the tower, is painted white and the roof red. Michael Kearney, Keeper; Philip Kough, Assistant.

1872. *Puffin Island, Greenspond*—The Light House on this Island is built of granite. The tower and keeper's dwelling are attached. The illuminating apparatus is dioptric, of the 4th order, and a fixed red Light is exhibited every night from sunset to sunrise; it is 85 feet above the level of the sea, and in clear weather should be seen a distance of 12 miles. The Light is visible from North by East, through South to West by North, by compass, and is situated in $49^{\circ}3'37''$ North lat., and $53^{\circ}32'27''$ West long. Fred. W. Oakley, Keeper.

No. 1, 1873. *Belloram, Fortune Bay*—A fixed white Light is exhibited nightly at this place from sunset to sunrise, at an elevation of 35 feet above the level of the sea, and in clear weather should be visible seven miles. The building is a wooden tower, painted white, and is situated in lat. $47^{\circ}29'$ North, and $55^{\circ}27'15''$ West long. The apparatus is dioptric, of the 8th order, with a single argand burner, and illuminates an arc of the horizon of 270° . In entering the harbor the light must be kept on the port hand. Samuel Clewett, sr., Keeper.

No. 2, 1873. *Rose Blanche Point*—This Light House is built of granite, upon the eastern head. The tower and keeper's dwelling are attached. The illuminating apparatus is dioptric, of the 4th order, and a fixed white Light will be exhibited from sunset to sunrise, at an elevation of 95 feet above the level of the sea, and it should be seen in clear weather for 13 miles. The light illuminates the horizon from East by South, through South to West, by compass, and is situated in lat. $47^{\circ}35'48''$ North, and $58^{\circ}41'30''$ West long. Shag Island Black Rock bears West from the light and distant about one mile. Rose Blanche shoals W.S.W., half mile, and Petites Black Rock E. by S. three miles. Keeper, John A. Roberts.

No. 3, 1873. *Fort Point, Trinity*—On and after 1st January, 1874, a fixed white Light will be exhibited nightly from sunset to sunrise at this place, upon a wooden tower painted white, and at a height of 75 feet above the level of the sea, and it should be visible in clear weather for 11 miles. The erection is situ-

ated in $48^{\circ}.21'.55''$ North lat., and $53^{\circ}.20'.51''$ West long. The apparatus is dioptric, of the 8th order, with a single argand burner, and illuminates an arc of the horizon of 320° . In entering the harbor the light must be kept on the port hand. Keeper William Rowe.

No. 1, 1874. *Cann Island, Seldom-come-By*—A fixed white Light is exhibited nightly at this place, from sunset to sunrise, at an elevation of 85 feet above the level of the sea, and should be visible 12 miles. The tower and dwelling are of wood and attached, and are situated in latitude $40^{\circ}.35'.05''$ N., and longitude $54^{\circ}.10'.33''$ W. The apparatus is dioptric, of the 8th order, with a single argand burner, and illuminates an arc of the horizon of 327° . John Hodnott, Keeper.

No. 2, 1874. *Boar Island, Burgeo*—A fixed red Light is exhibited nightly at this place, from sunset to sunrise, at an elevation of 240 feet above the sea, and should be visible 17 miles. The tower and dwelling are of wood, and attached, and are situated in latitude $47^{\circ}.30'.12''$ N., and longitude $57^{\circ}.35'.13''$ W. The apparatus is dioptric, of the 6th order, with a single argand burner, and illuminates the whole of the horizon of 270° . Ed. Dicks, Keeper.

No. 1, 1875. *Channel Head, Port-au-Basques*—A wooden light tower has been erected on this head, and on and after this date a fixed red Light will be exhibited thereon, at an elevation of 90 feet above the level of the sea. Lat. $47^{\circ}.33'.47''$ N., and Long. $50^{\circ}.07'.10''$ West. In clear weather the light should be visible twelve miles. The illuminating apparatus is dioptric, of the 8th order, with a single argand burner. The whole horizon is illuminated. Timothy Pike, Keeper.

Rocky Point, Harbor Breton, Fortune Bay—Situated in latitude $47^{\circ}.27'.30''$ N., longitude $55^{\circ}.47'.45''$ W. A square wooden tower carrying an octagon and lantern, in which a white light will be exhibited nightly, with a red light to mark the Harbor Rock.—Wm. Lorenzen, Keeper.

Garnish, Fortune Bay—A beacon tower of wood, carrying an octagon and lantern, in which a red light is exhibited nightly. Latitude $47^{\circ}.14''$ N., longitude $55^{\circ}.24'$ W. (approximate.) John Grandy, Keeper.

Beacon, Ireland Eye, entrance of LaPoile Bay—A square building of wood, painted white, with three black bands, has been erected on this Island. It is 75 feet high and is supported on four chains.

J. T. Nevill, General Inspector Light-houses.

Light Dues—One shilling per ton on all vessels entering any port or harbor of the Colony, except coasting, sealing, or fishing vessels; but not to be levied more than once in one year. Sealing and coasting vessels—sixpence per ton on registered vessels of 40 tons and upwards; fifteen shillings per ton on all vessels less than 40 tons.

The 19th of Victoria, Cap. 5, Sec. 5, enacts,—“That no greater sum than £25 sterling shall be in any year levied for Light Dues

on any steamer or vessel entering any port of this Colony; and no steamer plying between Europe and any port of North America, and entering any port of this Colony as a port of call, shall be liable to pay any Light Dues, or other port charges, except pilotage."

Gallantry Head, Island of St. Peter's—The Fixed Light on Gallantry Head, (Island of St. Peter's) since the 10th August, 1862, has been replaced by a Flash Light, with intervals of twenty seconds, and by one red flash after two white flashes; situated in lat. $46^{\circ}45'.30''$ N., long. $58^{\circ}27'$ W.; elevation above high water, 64 metres, (204 English feet). Distance at which the light is visible, 18 miles. The light is hidden at the Northward by the high land of St. Peter's.

Light at the South entrance of St. Peter's—Since 1st October, 1862, the entrance of the harbor of St. Peter's, called South Channel, has been marked by two small fixed Lights, one of which is a white Light, illuminating three fourths of the horizon, and placed on the Battery—and the other a red Light, on the plain at the north of the town. The white Light has an elevation of 11 metres, and is visible 6 miles. The red Light is elevated 19 metres, visible 3 miles distant. The line connecting these two Lights indicates the Middle Channel.

The position of the red Light has also been so determined that as soon as it is seen on the left of Cape Eagle, vessels coming from Columbiar in beating into the N.E. entrance will have nothing to fear from the shoals of Cape Rouge.

Light on the South West Point of the Islands of Dogs, called Pointe a Leconte—Commencing on the 1st of August, 1874, a Light will be exhibited on the South West Point of the Island of Dogs, at the place called Pointe a Leconte at 400 metres (437 English feet) above the level of the sea. It will be seen in clear weather 7 miles. The extent of the Light is circumscribed in a sector of 163° presenting two cones of Light, one white, of 40° , will light the passage of the S.E. so as to permit vessels which maintain position within this cone to avoid at the right the shoal Bataille, and to the left the rock of Cape Noir and the rock Bertrand. The second cone will be red, of 123° . It should be avoided by vessels entering by the S. E. passage, and will enable them, when they shall have quitted the white cone, to come to anchor in the roadstead or in the Barachois, in following the line of the white light from Pointe aux Canons, and of the red light from the interior of the city.

A Light House has been erected by the Government of Canada, on the Western side of Cape Ray, on the South-west coast of the Island of Newfoundland. Latitude $47^{\circ}37'$ N., Longitude $59^{\circ}18'$ W. A powerful flash White Light is exhibited, making a complete revolution in two and a quarter minutes, and flashing every ten seconds; at a long distance, however, it has the appearance of a steady light. The light can probably be seen at a distance of twenty miles in clear weather.

The Tower is a wooden building, hexagonal in shape, forty-

one foot high, and painted white. The keeper's dwelling, also of wood, stands at a little distance from the Tower, and is also painted white.

The illuminating apparatus is Catoptric and consists of twelve lamps and reflectors.

A Fog Whistle is in operation at Cape Ray. It will be blown in thick and foggy weather and during snow storms, for ten seconds in each minute, leaving an interval of fifty seconds between each blast. It can be heard from 3 to 15 miles.

MONEY ORDER BRANCH.

Thomas S. Dwyer, Superintendent.

Office Hours—From 9 a.m., to 4 p.m.

Money Orders are now interchanged with the United Kingdom, Dominion of Canada, and P. E. Island, at the following rates of Commission :

Scale for United Kingdom—Orders up to £2 stg., 1s. stg.; from £2, up to £5, 2s.; from £5 up to £7, 3s.; from £7, up to £10, 4s.

Scale for the Provinces.—Orders up to £5, 1s.; from £5, to £10, 2s.; from £10 to £15, 3s.; and from £15 to £20, 4s. No single order can be granted for more than £20. No half-pence to be introduced in the Orders.

Business of Money Order Office closes one hour before closing the Mails by the Halifax Steamer.

SYSTEM.

1—Money Orders are made out in forms supplied for the use of the Money Order Offices.

2—Persons applying for Money Orders are recommended to use printed "Application Forms," printed for that purpose.

3—Place of payment of a Money Order may be changed in accordance with instructions provided therefor.

4—Alteration of payee's name may be effected, by issue of a new order and payment of commission thereon.

5—Applicants for Money Orders are expected to observe due care in the examination of the same, relative to filling and stamping; defect in Orders, when presented for payment, may cause difficulty and delay, for which the paying office is not to be held accountable.

6—Postmasters should be particularly careful to obtain from the person who presents a Money Order, whether the rightful owner or not, full information as to the Christian name, surname and address of the party who originally obtained it, unless such party be a firm, when the name of the firm will suffice. *The only exception to this rule is*—When an Order is presented through the Bank, in which case it will suffice that the Order, being properly signed, be also crossed with the Banker's name.

7—As however, *after once paying a Money Order, by whomsoever presented, the office will not be liable to any further claim*, the public are strictly cautioned,—

1st—To take all means to prevent the loss of the Money Order.

2nd—To be careful on taking out an Order, to state cor-

rectly the Christian as well as the surname of the person in whose favor it is to be drawn.

3rd—To see that the name of the person taking out the Money Order is correctly known to the person in whose favour it is drawn.

8—Payment of a Money Order must be obtained before the end of the sixth calendar month after that in which it was issued, otherwise, a new Order will be necessary, for which a second commission will be charged; and if the order be not paid before the twelfth calendar month after that in which it was issued, all claims to the money will be lost.

Neglect of the foregoing instructions will risk the loss of the money, besides leading to delay and trouble in obtaining payment.

The Money Order Offices, are:—General Post Office, St. John's; Post Offices at Bay Bulls, Bonavista, Brigus, Burgeo, Burin, Channel, Carbonear, Ferryland, Fogo, Greenspond, Harbor Breton, Harbor Grace, Placentia, Trepassey, Trinity, Twillingate.

9—Postmasters should recommend the use of Money Orders for the transmission of money, in preference to such transmission otherwise.

Suggestions to the Public.

Facility will be given to the Post Office in the discharge of its daily duties, and greater security afforded to the Public, by careful attention to the following recommendations:—

Post all Letters and Newspapers, &c., as early as practicable, especially when sent in large numbers.

When a number of Newspapers are addressed to the same office, put them up in one parcel.

When a number of circulars are posted, tie them up in a bundle, with the addresses all in one direction.

Address letters, papers, &c., in a legible and complete manner, always giving the name of the Post Office; and if there be more than one Post Office of that name, the name of the district in which situated. In case of letters going abroad, the name of the country, as well as of the town and city, should be given in full. Letters, for example, intended for London, England, if simply addressed "London" would be forwarded to London, Canada West, and thus be delayed.

Letters, Papers or Parcels for Outports should have the name of the District, the Post or Way Office, distinctly written as part of the address. For instance, Letters for Bonne Bay, French Shore, are sometimes sent to Bonne Bay, Fortune Bay District, being simply directed Bonne Bay—there are several settlements named Broad Cove, Little Bay, English Harbor, Blackhead, Balline, Caplin Cove, Deer Island, Flat Islands, Fortune, Fox Cove, Freshwater, Island Cove, Long Harbor, Burgeo, New Harbor, Salmon Cove, Seal Cove, Ship Cove, and unless properly directed, are liable to go to wrong office for delivery. The loss

and inconvenience arising from imperfect directions, is caused by the carelessness of the sender, and no blame can attach to the Post Office—other places beside those named, have settlements with corresponding appellation, hence the necessity of being particular in addressing all letters, &c.

See that every letter, newspaper, or other packet sent by post, is securely folded and sealed. Every such packet has to be several times handled; and even when in the mail bag, is exposed to pressure and friction. Unless, therefore, the article be light and pliant, it should be enclosed in strong paper, linen, parchment, or some other material which will not readily tear or break.

Fasten the covers of newspapers firmly, so as to prevent them from slipping out.

When dropping a letter or newspaper into a letter-box, always see that the packet falls into the box, and does not stick in its passage.

Never seal letters for the East and West Indies and other hot climates, with wax. Such a practice is attended with much inconvenience, and frequently with serious injury, in consequence of the melting of the wax, and the adhesion of the letters to each other. In all such cases use wafers or gum, and advise your correspondents in the country referred to, to do the same.

Never send money or other articles of value through the Post Office, except either by means of a money order, or in a registered letter. "Any person who sends money or jewellery in an unregistered letter, not only runs a risk of losing his property, but exposes to temptation every one through whose hands his letter passes, and may be the means of ultimately bringing some clerk or letter carrier to moral ruin." Carefully secure every letter or packet containing money or value, first with gum and afterwards with good sealing-wax, on which mark the clear impression of the seal.

On posting a registered letter or packet, always obtain a receipt for the same at the office where posted.

When letters or papers are delayed or missing, at once communicate the fact to the Postmaster of the Division in which is situated the Post Office at which the delay or missing letters were posted. In case of a missing letter enclose value, state the exact contents, the exact address, and the office at which posted; the name of the person by whom posted, and the name of the person by whom received at the office. In the case of a delayed letter or paper, send the cover or wrapper in an entire state, in order that the place of delay may be ascertained by an examination of the post marks.

Trouble and loss occasionally arise out of the carelessness or dishonesty of parties employed in the Post Office service; yet instances are not wanting in which it has been shown to the satisfaction even of the complainants, that the fault at first attributed to the Post Office, in truth rested in other quarters. Theft by private hands, although very difficult of proof, have not unfrequently been brought to light; and it is greatly to be desired that those who suffer loss should, in the first instance, and while the circumstances are fresh, endeavor to ascertain

with the utmost precision all particulars respecting the despatch or receipt of the lost letters or papers, and lose no time in communicating this information to the Postmaster. Indeed, generally speaking, it is only by careful inquiry into minute details that the offender can be detected, whether he be a servant of a department or not.

The Post Office is a department which admits of constant improvement and expansion. The public, by sending to the Postmaster General, clear and correct information respecting faulty arrangements, may materially benefit the service. It must be remembered, however, that changes in machinery so extensive and intricate as that of the Post Office, must be made cautiously and with much previous consideration.

Time is generally required to carry out any material change in postal arrangements; for even when decided upon, old contracts, requiring notice of termination, may have to be got rid of, and tenders of new contracts invited by public advertisements, before the decision can take effect.

New Post Offices are established by the Department wherever it is ascertained that a sufficient number of inhabitants can be accommodated, and a sufficient amount of postal revenue collected to warrant such a measure. When a new Post Office is required, a petition should be addressed to the Postmaster General, signed by as many of the inhabitants as can conveniently subscribe the same. The petition should state the name of the settlement and district in which it is desired the office should be established; the distance from the neighboring offices; whether at the sight of the proposed Post Office there is a village; the number of mills, stores, taverns, and houses thereat; the extent of the settlement to be served and the probable cost of the mail; together with any other facts which may form any ground for the accommodation applied for.
